

Inspiration from the previous Seminar

Natura 2000 Biogeographical Process

Thomas deFoort (Agency for Nature and Forests, Flanders)

3rd Natura 2000 Atlantic Seminar

12-14 June 2019 Antwerp - Belgium

Good to see you in person!

Natura 2000 Biogeographical Process

Themes of the previous meeting

Natura 2000 Biogeographical Process

- Protection and conservation of meadow birds
- Integrated approaches to tackling nitrogen pollution (air and water pollution) on Natura 2000 sites.
- Improving the conservation of Natura 2000 sites through integrated management
- Communication and stakeholder engagement in Natura 2000

Excursions

Natura 2000 Biogeographical Process

Polders of Kruikeke and Steendorp fortress

Groot Saefthinge cross-border park

Kalmthoutse Heide – De Zoom cross-border park

Results from the previous meeting

Natura 2000 Biogeographical Process

- Insights in the approach in Flanders (Belgium) on the management of N2000 sites in an intensively used landscape
- A need for capacity building in Member States and peer to peer exchange visits on all topics
- Funding is often a limiting factor in the development of integrated or multi-actor projects
