Join Life2Taiga's international webinar!

Prescribed burning in protected forest areas: containing risks while maintaining biodiversity

September 10th and 11th
9.30 – 13.00 CET time

The Life2Taiga-project invites you to join two webinars on the role of prescribed burning in the management of forest ecosystems. Speakers from all over Europe, as well as from the United States will present and discuss prescribed burning, both in terms of its importance for biodiversity and its potential to mitigate the risk of catastrophic wildfires.

Programme Sept 10th

Overview of the role of fire for European ecosystems
How prescribed fire is used in different parts of Europe and in the US

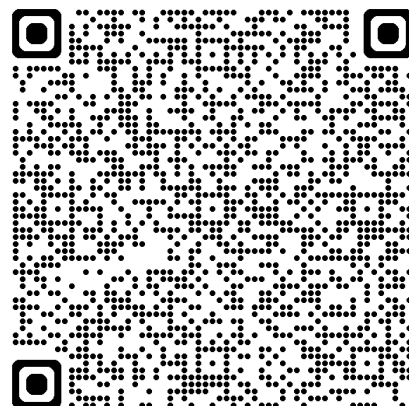

Programme Sept 11th

How to overcome policy obstacles with case examples of policy shifts, success stories and lessons learned from previous processes
